guide

MICA enriches and elevates any environment with its natural lustrous properties. These unique metallic flakes are available in 7 standard colors, 3 size profiles, and 12 signature blends.

Both high-density and standard MICA can be added to accent signature FLAKE blends. Solid colored MICA and signature blends can be installed alone to create a metallic finish that cannot be achieved with engineered materials.

product information

metallic luster

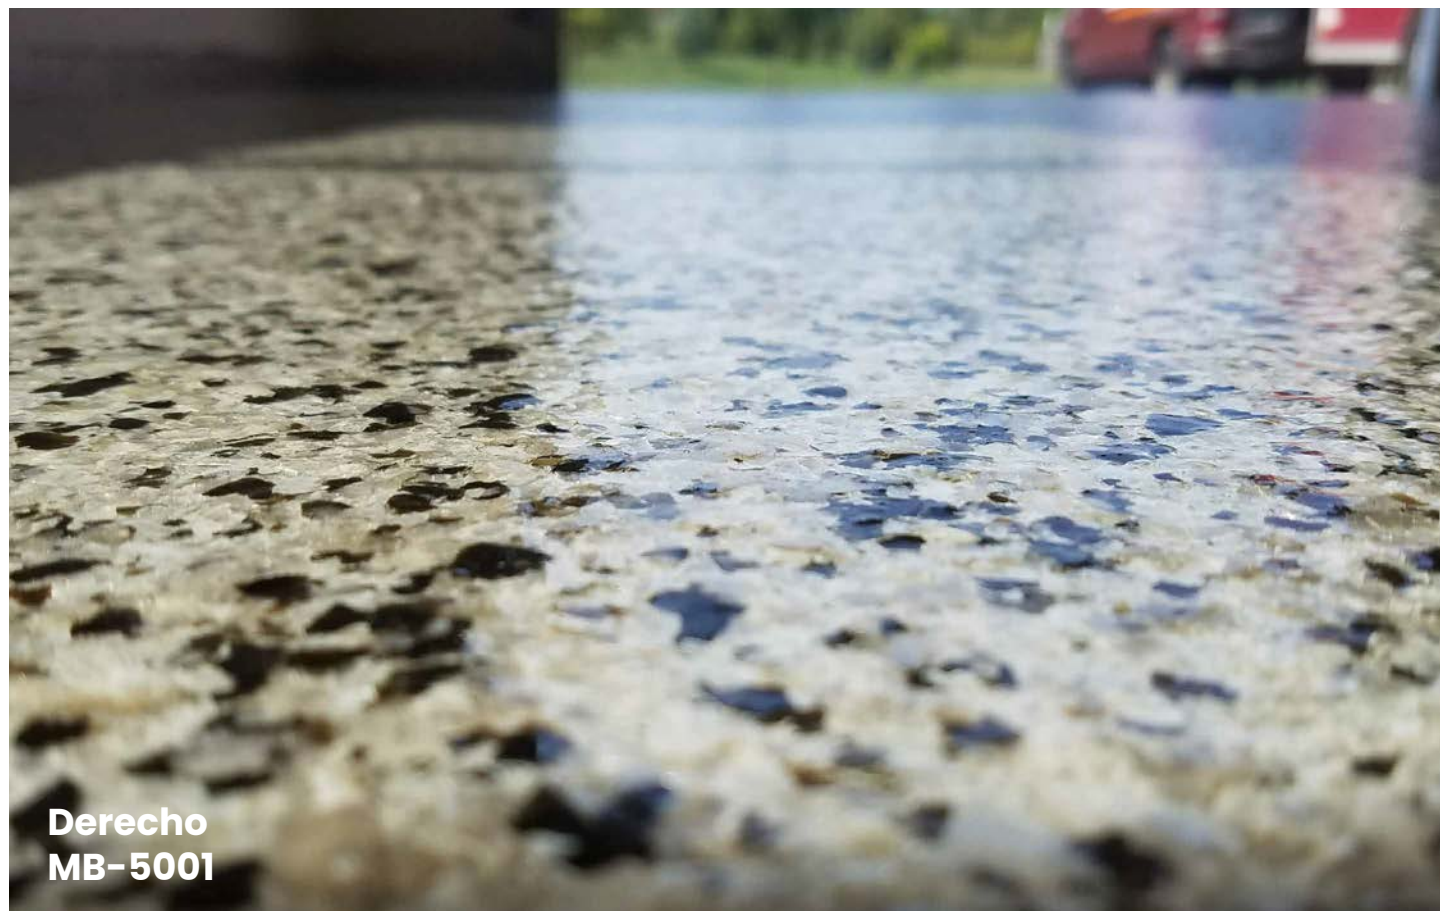

MICA enriches and elevates any environment with its lustrous properties. MICA is a sheet silicate mineral which includes muscovite, phlogopite, biotite, and clintonite and possesses a natural metallic shine that can not be replicated with synthetic materials.

hygienic and seamless protection

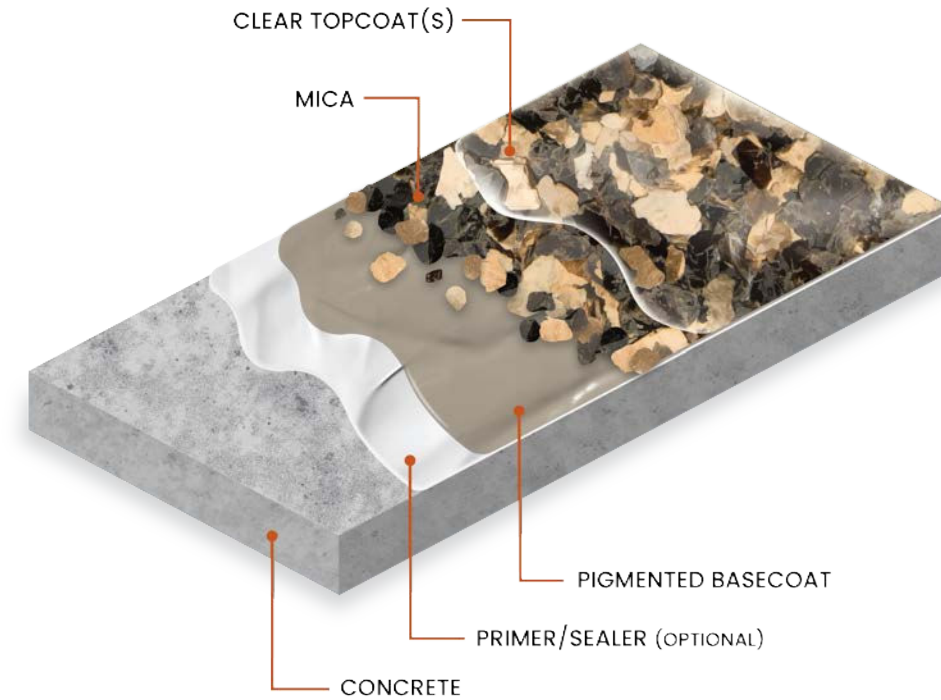

Resinous and high-performance flooring systems create seamless surfaces that are extremely durable and easy to maintain. The non-porous surface makes spills easy to clean and provides superior protection against the growth of mold and bacteria compared to tile and grout options.

design options

Enhance your next flooring project with a selection of 7 natural colors and 4 standard sizes. MICA can be used alone for a dramatic metallic look or to accent FLAKE by adding a small percentage of MICA to any blend.

MICA floor system illustration

For best results, a clear topcoat is recommended to fully encapsulate MICA and provide a durable wearing surface.

benefits of MICA flooring systems

- DURABLE** Resinous flooring systems provide superior chemical and abrasion resistance over pre-engineered floors.
- DECORATIVE** MICA enhances high-performance flooring by adding natural luster and texture to complement any environment.
- FLEXIBLE** Resinous flooring systems provide a flexible surface that deadens the noise of foot traffic and carts.
- HYGIENIC** Resinous flooring systems are wax free and easy to upkeep and clean with just soap and water.
- SEAMLESS** Resinous flooring creates a seamless, flowing surface that won't collect dirt, moisture, or germs.
- RENEWABLE** After years of use, efficiently revitalize your resinous floor by sanding the surface and applying a new topcoat.
